***Double Patenting***

1. Claims 14-29 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 5875187. Although the conflicting claims are not identical, they are not patentably distinct from each other because both set of claims are directed to receiving the multiplexed digital signal; demultiplexing the multiplexed digital signal to generate a short messaging signal and a voice channel assignment signal; and screening the voice channel assignment signal from further processing except for decoding the short messaging signal or rebroadcasting. It would have been obvious to one of ordinary skill in the art at the time the invention was made to decode or rebroadcast the message.
